AN INTRODUCTORY BIBLIOGRAPHY ON HONDURAS

by

Tom L. Martinson
Director,
Institute of International Studies
Ball State University

This bibliography, selected from the thousands of works available on the republic of Honduras, is designed to introduce the beginning researcher to a wide variety of topics, themes, and authors who have contributed to the understanding of that country from early times to the present. The articles and books represented here are valuable to a wide range of scholars, especially planners.

The wide topical and historical range of these works obvious to the user; a few words should be devoted to the limitations of the bibliography. It was the intent of the compiler to exclude such items as the obviously descriptive travel literature except that valuable for recreating past landscapes, anthologies, poetry, essays, textbooks, government reports, acts, or decrees, general works with subsections on Honduras, presidential messages, official proclamations, theses and dissertations, or short pamphlets. The emphasis is on representative scholarly sources in English and Spanish. It is hoped that the number of entries on each theme indicates the proportion of works on that theme available in the literature as a whole.

This bibliography was compiled from a wide variety of sources, including such general reference works as Gropp, Arthur E. (comp.) A bibliography of Latin American bibliographies (Netuchen, New Jersey: Scarecrow Press, 1968), Duron, Jorge Fidel, Indice de la bibliografia Hondurena (Tegucigalpa: Imprenta Calderon, 1946), and Garcia, Miguel A. Bibliografia Hondurena (Tegucigalpa: Banco Central de Honduras, 1971) 2 Vols.; such library catalogs as the Library of Congress Author Catalogs series and the American Geographical Society Research Catalogue, and such guides to serials as the Public Affairs Information Service (PAIS) Bulletin, Social Sciences and Humanities Index, and Biological Abstracts. Please send comments and corrections to the compiler.

The compiler wishes to thank Mr. Charles Staley, a graduate student in Geography at Ball State University, for invaluable assistance in producing this bibliography.
